

Everything You Need To Set Up So That Recording Equipment Doesn't Shut Off !

HOW TO SETUP: YETI Blue USB microphone

Plug Yeti microphone USB cable into microphone and laptop (use with UFO laptop only).

Plug in UFO laptop power cable into an outlet (so computer doesn't shut down).

On laptop, open **Audition** program. At top tab, beside **File** :

- > select **Edit**
- > select **Audio Hardware Setup**
- > select **Control Panel** button
- > select **Input** > select microphone yeti & microphone speaker (headphones)

In multi-track setup

- > select stereo
- > select Audition mix
- > Arm Track
- > select red **Record Button**

SELECT Stop button (square) to stop recording.

SAVE YOUR FILES:

- > select File > Save Session As > name your file (use this Format: OH_yy.mm.dd._StephaneInterview)
- > select File > Save All Audio As >
